PROFILE

B.Des User Experience student and systems-driven product designer specializing in FinTech, accounting automation SaaS, and behavioral banking products. Combines deep domain understanding of financial reconciliation and double-entry workflows with end-to-end implementation—from user research and mental models to production code, API orchestration, and responsive deployment.

EXPERIENCE & SHIPPED PRODUCTS

LEDGERMATE | Product Engineer & Founder — 2026 | US Accounting Clients

- Conceived, designed, and engineered a custom B2B SaaS automation platform while working as a junior accountant, eliminating repetitive daily bill entry for US property management portfolios.
- Automated multi-ERP sync across Google Sheets, QuickBooks Online, Buildium, and RentVine APIs, with direct PDF evidence linking and a multimodal vision pipeline for handwritten contractor receipts.
- Compressed daily 5-hour manual bill entry into a 5-minute automated batch process (**98% operational time reduction**) with 100% audit integrity and zero reconciliation errors.

WEBGRAPHIC BEE | Founder, Product Designer & Developer — 2026 - Present | Dehradun / Remote

- Lead client product engagements from discovery, user flows, and information architecture to high-fidelity design systems, frontend development, and production Vercel/GitHub deployment.
- Shipped launch-ready, conversion-tested platforms across financial services, advisory, education, and SaaS.

MIND PALACE XR | Contributor, XR Developer & System Integrator — 2026 - Present | Research Collaboration

- Developed a spatial memory computing system for Meta Quest 3 using Unity 6, C#, and OpenXR in research collaboration with Associate Professor Samarth Reddy, translating the Method of Loci into 3D cues.
- Integrated headset camera feeds with an asynchronous FastAPI relay for multimodal Gemini Vision AI processing and runtime glTF 3D anchoring with offline procedural fallbacks.

SELECTED FINTECH PROJECTS

SBI MINDFUL POCKET | Lead Product Designer (FinTech & Behavioral Design) — 2026 | Android & iOS · Concept

- Conceptualized a mobile companion for SBI YONO Youth that converts late-night doomscrolling friction into compounding micro-savings (+Rs. 10/save into SBI liquid vaults at 7.1% p.a.).
- Conducted mixed-methods research (**57-student survey + 8 in-depth interviews**): revealed 78% of students exceed planned screen time, primarily displacing sleep and triggering midnight impulse spends.
- Architected behavioral intervention loops (implementation intentions, 15-second breathing Money Bytes) and designed an **RBI-compliant zero-OTP internal sweep mechanism** via liquid sub-accounts.

FINLOBY | Product Direction, UX & Responsive Web (finloby.com) — 2026 | Live Client Platform · Dubai

- Reframed complex financial and legal liability advisory into a high-trust digital experience, successfully positioning advisory for **AED 850M+ in restructured liabilities** across 36+ banking partners.

DUBAI DEBT SOLUTIONS | UX Strategy & Frontend Engineering (dds-kohl.vercel.app) — 2026 | Client Preview · Dubai

- Engineered a compassionate, confidential debt assessment intake flow that demystifies multi-bank debt evaluation into a structured 3-step recovery roadmap, optimizing conversion for distressed borrowers.

EDUCATION & RECOGNITION

GRAPHIC ERA UNIVERSITY | Bachelor of Design (B.Des) — Expected June 2029 | Dehradun, India

Major: User Experience Design | **Academic Standing:** CGPA: **10.00 / 10.00** (First Year)

- Nominated by Graphic Era University to attend **Adobe NEXT Live, Mumbai in 2026**.
